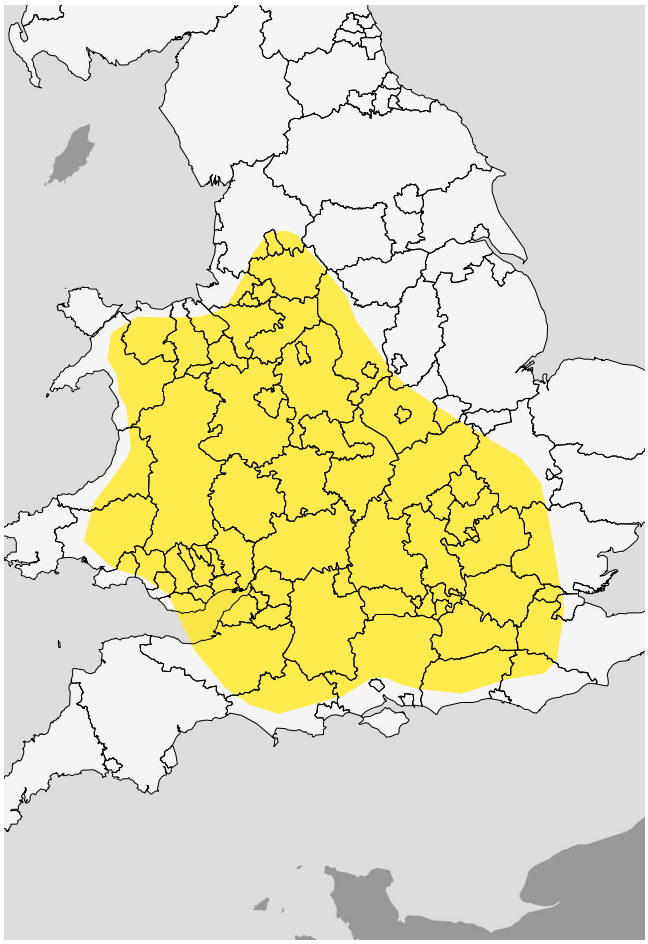
Yellow warning
Snow & Ice

Between
00:00 Mon 28 Dec 2020 and
18:00 Mon 28 Dec 2020



Rain may turn to snow, which along with widespread ice, will lead to the potential for some disruption to travel and utilities.

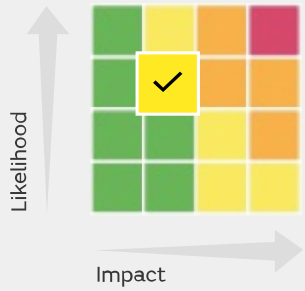
What to expect

- Some roads and railways likely to be affected with longer journey times by road, bus and train services
- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths

Further details

An area of rain is likely to move south through Sunday night and Monday across parts of England and Wales. There is the potential for this to turn to snow for a time.

There is a lot of uncertainty in where snow develops with some areas seeing little or no accumulations. However, there is a very low likelihood of 1-3 cm, and locally 5-10 cm falling in a few places, particularly over higher ground of Wales above 200 metres.



Medium likelihood of low impacts

Issued at 10:21 Sun 27 Dec, 2020
